

FAULENBACH SCHMIEDETECHNIK GMBH

HIGH QUALITY FORGINGS FROM
SPECIAL MATERIALS

FAULENBACH SCHMIEDETECHNIK GMBH

The work that we do is not very widespread. In fact, there may only be a handful of companies who offer the same we do. We specialise in the preparation of high-quality forgings from special materials and concentrate on processing specific alloys, most of which are based on nickel or titanium.

»» QUALITIES THAT MAKE US STRONG

- »» **HIGH QUALITY**
including DIN EN ISO 9001:2008 certification and others
- »» **QUICK AND FLEXIBLE**
through our comprehensive stock of primary materials
- »» **ADHERENCE TO DELIVERY DATES**
with optimum process management
- »» **EXTENSIVE EXPERIENCE**
thanks to a wide variety of industries
- »» **ENORMOUS KNOW-HOW**
in forging and materials engineering
- »» **A HIGH LEVEL OF SPECIALISATION**
in the production of special materials

»» QUALITY MANAGEMENT

In order to meet our high standards of quality, our process operations are continually checked, optimised, and refined.

In addition we have specially qualified employees in house to check the entire product creation process through destructive and non-destructive tests. Standardized key elements here are for example hot tensile tests or notched bar impact tests and ultrasonic tests or penetrant tests.

Furthermore we are among others accredited according to:

- »» **DIN EN ISO 9001:2008**
- »» **KTA 3211.1**
- »» **DGR 97/23/EG-CERTIFICATE**
- »» **AD 2000-MERKBLATT W0**

»» APPLICATIONS

Chemistry & Pharmaceuticals

Electronics & Electrical Engineering

Energy Production

Nuclear Technology

Offshore & Marine Technology

Petrol Chemistry

Extrusion Industry

Automotive Industry

YOU'VE FOUND THE RIGHT SPOT

NOT THE BUSINESS AS USUAL -
WE SEEK A CHALLENGE

»» WE PRODUCE THE THINGS THAT OUR CUSTOMERS WANT. WHETHER MASS PRODUCTION OR INDIVIDUAL PIECES.

We concentrate on processing special materials, most of which are based on nickel or titanium. Please find our current delivery programme on our website:

www.faulenbach-gmbh.de/en/materials/

OPTIMUM PROCESS MANAGEMENT

FLEXIBILITY THROUGH EXTENSIVE STOCK OF PRIMARY MATERIALS

»» IT FILLS US WITH PRIDE TO BE ALLOWED TO WORK FOR SUCH DISCERNING CUSTOMERS.

Our customers expect highly reliable products, as they are based in branches that set high demands on machinery, system units and working materials:

- »» Electronics and Electrical Engineering
- »» Energy Production and Nuclear Technology
- »» Offshore and Marine Technology
- »» Petrol Chemistry
- »» Extrusion Industry

FAR-REACHING EXPERIENCE

FORGED PRODUCTS FOR NUMEROUS BRANCHES

»» QUALITIES THAT BENEFIT OUR CUSTOMERS.

Because of our primary materials storage place, we are particularly oriented towards working quickly and with flexibility.

The flexibility is enhanced by the mechanical competence of the further processing that allows us to process forged products, either preliminarily or to the finish, according to the client's drawing.

Furthermore, process efficiency and delivery periods take top priority at our house.

ALL UNDER ONE ROOF

FORGING, PEELING,
TURNING AND MILLING

»» **QUALITY IS WHEN THE CUSTOMER COMES BACK. AND NOT THE PRODUCT.**

Client satisfaction is an important quality and is our daily challenge. We justify this through the high quality of our products and services, as well as timely deliveries. We are convinced that alone the ongoing improvement of the quality of the products and growing services can also in future guarantee that which we are very proud of today: our high customer satisfaction.

We work according to all current and also of course client-tailored specifications. In addition, we are also in the position of reacting to our customer's needs quickly, thanks to an accredited proofing laboratory and close co-operation with the TÜV quality assurance.

FROM DIN EN 9001 TO KTA 3211.1

TOP QUALITY THROUGH ONGOING IMPROVEMENT

»» **WE ARE LOOKING FORWARD
TO HEARING FROM YOU.**
